

Facilitation

Founded in 1973, SAMI VE LLC (formerly Systematic Analytic Methods and Innovations) serve clients worldwide. We specialize in Value and Quality Improvement Processes such as Value Engineering and Lean Technologies. Our value consultants have extensive experience in virtually every industry and project type.

Clients

Governments

- Federal
- State
- County
- Municipal

Private Industry

- Manufacturing
- Construction
- Retail
- Management

Example Projects

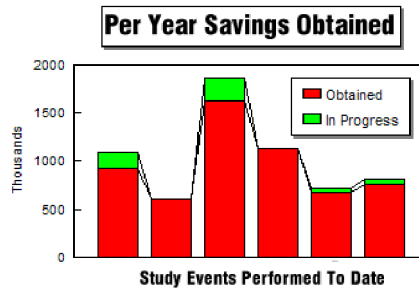

Railcar Manufacturer

After helping the client identify initial opportunities, we helped them generate a plan of action for the timing of events and implementation of the study results. Each study event we conducted has currently generated a verified average of one million per year per event and any implementing costs were recovered either immediately or within the first year.

The results of the studies and the fact that the savings and product improvements continue indefinitely has helped this manufacturer turn around their company in spite of raising costs. Further, as the company has seen the benefits, more of the people are now using the process events to drive even more ongoing profitable changes.

Roadway Realignment with Railroad Impacts

The Wadsworth Bypass affects a huge number of historic, city, county, state, Federal, business, commuter, and other interests. Due to the political issues, the value study was performed at the Environmental Assessment phase. The study produced cost, engineering, time, and coordinating improvements, and was nominated for an award by AASHTO (American Association of State Highway Transportation Officials) due to its success for adding value to the project and in bringing together many diverse interests.

Typical Activities

Selection Activities

Assist identify project and select team. Help develop study mission guide.

Preliminary Analysis

Using data of firm, generate preliminary analysis, and produce graphical and other analysis documents to assist effort.

Facilitation

Facilitate multi-discipline team and firm to meet cost and quality goals using value processes, value job plan, lean processes, and mission guide.

Post Team Efforts

Help management select resulting study result options and help firm implement, monitor, verify, and report activities.

Post Team Review Options

Using "lessons learned," help client identify additional opportunities. Restart selection as appropriate.
